

Rahul Sandesh

Final-Year AI Student | Aspiring Software Engineer | Entrepreneur
rahulsandeshx3000@gmail.com | 9400317220 | Kumband
LinkedIn | GitHub | Portfolio

SUMMARY

Final-year B.Tech student specializing in AI with hands-on experience in LLMs, RAG pipelines, ML workflows, and ROS-based robotics. Strong foundation in Python, C++, React, and DSA. Entrepreneurial mindset demonstrated through managing a successful printing business. Passionate about developing scalable and impactful AI-driven solutions.

EDUCATION

Bachelor of Technology (B.Tech), Computer Science & Engineering (AI) Expected 2026
Providence College of Engineering
Final Year (2022–2026)

SKILLS

Programming: Python, C++, Java, JavaScript, TypeScript, React
AI: Machine Learning, Neural Networks, Model Optimization, Data Preprocessing
NLP / LLMs: LLMs, RAG Pipelines, Chatbot Development, Prompt Engineering, NLP Pipelines
Frameworks & Tools: ROS, OpenCV, Firebase, Git, NumPy, Pandas, Llama Models
UI/UX: Figma, Canva
Soft Skills: Leadership, Entrepreneurship, Communication, Rapid Learning

EXPERIENCE

Product Development Intern — Drizzla Digital Solutions (Remote) Dec 2025–Jun 2026

- Contributing to product development and R&D initiatives for AI-driven solutions.
- Supporting dataset preparation, feature implementation, testing, and technical documentation.

AI Intern — Pramana AyurTech Solutions (Remote) 2024–2025 (Completed)

- Integrated LLM and RAG pipelines into the ePramana Clinical Decision Support System.
- Automated clinical query responses, improving workflow efficiency by **35%**.
- Built structured data extraction modules for Ayurvedic clinical documentation.

Founder & Operator — Printing Business 2021–Present

- Served **300+ client orders** with consistent satisfaction and repeat customers.
- Managed pricing, logistics, vendor relations, and budgeting independently.
- Built strong customer communication and management skills.

Treasurer — AI Council (Providence College) 2023–Present

- Managed finances for AI workshops involving **200+ students**.
- Oversaw expenditure approvals and resource allocation for events.

Event Organizer — College Esports Event 2024

- Organized and managed a large-scale esports tournament on campus.

PROJECTS

Mock Interview with AI (Final Year Project) 2024–Present
Tech Stack: Python, React, Llama Models, RAG

- Developing an AI-powered mock interview platform offering real-time feedback on clarity, relevance, and communication.

BloodSync Chatbot for Blood Donation 2024
Tech Stack: Python, Flask, Local LLM

- Built a donor–recipient matching chatbot using offline LLM inference.
- Reduced manual matching effort by **60%**.

Doctus Grid — AI Educational Station (Under Development)

2025

Tech Stack: React, Node.js, Express, Tailwind CSS, LLMs, Pollinations.ai

- Developing a multimodal AI learning platform with a multi-persona engine adapting AI behavior to different learning styles.
- Designing persona-based system prompts for context-aware educational responses.
- Integrating logic-free image generation triggered by keywords directly within chat.
- Implementing a responsive glassmorphism UI with persistent chat sessions using local storage.

Mobile Robot Development (ROS)

2024

Tech Stack: ROS, Python, OpenCV

- Developed autonomous navigation and object detection with sensor fusion.

Online Scoreboard (React + Firebase)

2024

Tech Stack: React, TypeScript, Firebase

- Built a real-time scoreboard system used by **200+ students**.

UAV Workshop Project

2024

Tech Stack: UAV Firmware, Python

- Assembled and programmed a UAV prototype with semi-autonomous flight.

Grayscale-to-Color ML Model

2022

Tech Stack: Python, Supervised ML

- Implemented a model to colorize grayscale images.

E-Learning App UI (Figma)

2024

- Designed a clean and intuitive e-learning interface.
