

Rahul Sandesh

AI/ML Engineer · LLMs · RAG Pipelines · Python · React

KUMBANAD, KERALA, INDIA // RAHULSANDESHX3000@GMAIL.COM

LINKEDIN.COM/IN/RAHUL-SANDESH-8A1786246/ // GITHUB.COM/FLAME77X

SUMMARY

AI/ML Engineer with hands-on experience designing and deploying LLM inference systems, RAG pipelines, and NLP-driven data extraction modules in production. Proficient in Python, React, and TypeScript, with a strong foundation in deep learning, computer vision, and ROS-based robotics.

EXPERIENCE

Associate Software Engineer

MAY 2026 – PRESENT

Drizzla · Remote

- Shipping production features for an AI-driven SaaS platform in Python, React, TypeScript and REST APIs across 3 active product modules.
- Designing data transformation pipelines (Pandas, NumPy) processing 15K+ records for ML training and inference workflows.
- Delivering every assigned feature on schedule through the first 4 sprint cycles with cross-functional teams.

Product Development Specialist

JAN 2026 – MAR 2026

Drizzla · Remote

- Built end-to-end dataset preparation pipelines and structured data workflows, cutting data cleaning time by 35%.
- Implemented and tested 5+ features across the product stack against professional code review standards.
- Authored technical documentation for 4 core modules, reducing onboarding time for new team members.

AI Intern

JUN 2025 – NOV 2025

Pramana AyurTech Solutions · Remote

- Architected and integrated LLM inference and RAG pipelines (Python, Llama-based models) into the ePramana Clinical Decision Support System, reducing manual workflow effort by 35%.
- Engineered custom NLP extraction modules parsing unstructured Ayurvedic clinical notes into structured database records.
- Refined prompt engineering strategies across 200+ domain-specific medical queries, lifting response relevance accuracy above 90%.

Treasurer

2023 – 2025

AI Council, Providence College of Engineering · Chengannur

- Managed the annual budget for AI workshops and events serving 200+ students with zero budget overruns across 2 academic years.
- Coordinated vendor procurement and logistics for 5+ technical events, all delivered on budget and on schedule.

Founder & Operator

2021 – PRESENT

Printing Business

- Built and independently operated a printing services business, fulfilling 300+ client orders with a strong repeat-client rate.
- Managed pricing, vendor negotiations, logistics and customer relationships end to end.

PROJECTS

Voca AI

2024 — PRESENT

Python · React · Llama Models · RAG · LangChain

AI-powered mock interview platform giving real-time feedback on answer clarity, relevance and communication quality through LLM inference and retrieval-augmented generation. RAG pipelines feed a React frontend and structured feedback engine with context-aware question generation across multiple interview domains.

Doctus Grid

2025

React · Node.js · Express · Tailwind CSS · LLMs · REST APIs

Multimodal AI learning platform with a multi-persona engine that adapts LLM behaviour to different learning styles via persona-based system prompts. Glassmorphism UI with persistent chat sessions and keyword-triggered image generation.

BloodSync

2024

Python · Flask · Local LLM

Donor-recipient matching chatbot running fully offline LLM inference, reducing manual matching effort by 60%.

Mobile Robot Development

2024

ROS · Python · OpenCV

Autonomous navigation and object detection modules with multi-sensor fusion for a mobile robot platform.

EDUCATION

B.Tech, Computer Science & Engineering (AI)

2022 — 2026

Providence College of Engineering · Chengannur, Kerala

Coursework: Deep Learning, Natural Language Processing, Data Structures & Algorithms, Computer Vision

SKILLS

PROGRAMMING	Python, C++, Java, JavaScript, TypeScript, SQL
AI / ML	Machine Learning, Deep Learning, Neural Networks, Model Optimization, Data Preprocessing, scikit-learn
NLP & LLMS	LLMs, RAG Pipelines, LangChain, Prompt Engineering, Chatbot Development, NLP Pipelines
FRAMEWORKS & TOOLS	React, Node.js, REST APIs, ROS, OpenCV, Firebase, Git, Docker, Pandas, NumPy
DESIGN	Figma, Canva, UI/UX

CERTIFICATIONS

- Introduction to Claude Cowork — Anthropic
- Introduction to Model Context Protocol (MCP) — Anthropic
- Claude Code 101 — Anthropic
- Project Management with ClickUp — ClickUp
